

Bug report #01

Severity: Trivial

Environment:

MacBook Pro (Retina, 15-inch, Late 2013) ME293

macOS Sierra 10.12

Issue: Desynchronization Siri icon in the top menu and the checkbox responsible for showing

Summary: The Siri icon in the top menu is no longer adequately respond to the change of status in the checkbox under continuous clicking

Steps to reproduce:

1. Open «System settings»
2. Click «Siri»
3. Fast clicking to checkbox «Show icon in menu line»

Actual result: Icon shown when checkbox is disabled or don't shown when enabled

https://www.dropbox.com/s/dx76mcxvwuqxhhf/Screenshoot_01.jpg?dl=0

Expected: show when checkbox enable and don't show when disable

Bug report #02

Severity: Minor

Environment:

MacBook Pro (Retina, 15-inch, Late 2013) ME293

macOS Sierra 10.12

Issue: Impossible to swap the status icon in the top menu

Summary: icon in the top menu doesn't change position by switching off and on again

Expected: when icon is disable and launching again it's stay at first position (in ElCapitan it works correctly)

Bug report #04

Severity: Minor

Environment:

MacBook Pro (Retina, 15-inch, Late 2013) ME293

macOS Sierra 10.12

Issue: Logo «Apple» and progress bar changes position when the system boots

Summary: At system startup, the status bar and logo fast change his position to up and after one second come back to the center of the display, after that is shown start screen

Expected: logo and status bar should always remain in the center of the display
